👤 PROFESSIONAL SUMMARY

Full Stack Developer with experience building scalable web applications using React, TypeScript, Node.js, and NestJS. Skilled in designing REST APIs, authentication systems (JWT, RBAC), and database architecture. Focused on clean code, performance, and production-ready systems.

🎓 EDUCATION

08/2025 – 06/2026

Tashkent

Web Praktikum N4

Najot ta'lim

🧠 SKILLS

Backend

Node.js, NestJS, Express.js, REST API, Microservices, PostgreSQL, MongoDB, MySQL, Prisma, TypeORM, JWT, Docker

Frontend

React, Next.js, TypeScript, Redux Toolkit, React Query, Tailwind CSS, SCSS

📁 PROJECTS

03/2026 – 05/2026

Bootchat.uz chat

Real-time chat application similar to Telegram

Tech: React, NestJS, Node.js, PostgreSQL, Prisma, WebSocket, JWT, Docker

- Developed a real-time chat application with messaging and online status features
- Implemented WebSocket-based communication for instant updates
- Designed relational database schema (Users, Chats, Messages)
- Built secure authentication system (JWT + OTP + bcrypt)
- Created REST API with Swagger documentation

02/2026 – 04/2026

Flypost.uz

Logistics and parcel tracking management system

Tech: React, TypeScript, Fastify/NestJS, Node.js, PostgreSQL, TypeORM, JWT, Swagger, Throttler

- Developed a scalable logistics management system for parcel delivery and tracking
- Implemented secure authentication system with JWT and Role-Based Access Control (RBAC)
- Built high-performance REST APIs with filtering, tracking, and status automation

- Designed layered backend architecture with clean code principles
- Integrated real-time dashboard using React with Redux Toolkit / React Query
- Implemented rate limiting and validation to ensure system security

04/2026 – 06/2026

PrimeAvto

Automotive service and vehicle platform frontend

Tech: React, TypeScript, Next.js, Tailwind CSS (yoki ishlatganlaring bo'lsa qo'shamiz)

- Developed a responsive frontend interface for an automotive-related platform
- Built reusable UI components and structured component-based architecture
- Implemented dynamic pages and API integration using Axios / React Query
- Ensured mobile-first responsive design and cross-device compatibility
- Optimized user experience with clean and modern UI/UX design

02/2026 – 06/2026

Dorixona

Pharmacy inventory and order management system backend

Role: Backend Developer **Tech:** Node.js, NestJS/Express, PostgreSQL/MongoDB, Prisma/TypeORM, JWT

- Developed backend system for pharmacy management platform
- Designed database structure for products, orders, users, and inventory
- Implemented secure authentication and role-based access control (RBAC)
- Built RESTful APIs for product management, ordering, and stock tracking
- Ensured data validation, security, and scalable architecture

★ ADDITIONAL INFORMATION

- Strong problem-solving skills with a focus on clean backend architecture, performance optimization, and maintainable code design
- Experience working in Agile development teams, actively participating in sprint planning, backend code reviews, and collaborative API development
- Passionate about scalable backend systems, security best practices, and efficient database design
- Open to contributing to open-source backend projects and committed to continuous professional growth in server-side technologies
